

BAPTISTE HIGGS

Experience

Software Engineer
Computational Designer
Lendlease Podium

2021-2025

Built web visualisation tools using React & Three.js. Developed a common Object Model for interoperability. Prototyped various machine learning optimisations. Developed ecosystem of Grasshopper plugins for design automation. Migrated core system logic to Java backend.

Computational Designer & Researcher
BVN Architecture

2017-2021

Published 6 technical articles with high traffic. Collaborated on innovative technologies with commercial adoption including 1 patent & 2 papers. Researched, prototyped, and developed in-house tools that increased productivity and intelligently informed key decisions.

Academic Tutor & Researcher
University of New South Wales

2018-2021

Taught 100+ students Grasshopper, Python, & digital fabrication. Developed & researched tools for IoT sensor data interpretation for data-driven design.

Education

G.C. Machine Learning & Computer Vision | GPA: 6.5
Australian National University

2020

Bachelor of Computational Design | WAM: 84.7
University of New South Wales

2017-2019

About

Skilled Front-end Software Engineer with 7 years industry experience. Passionate about innovation, automation, and optimisation. Loves learning & collaborating with others.

Skills

Machine Learning

Python

C#

Web Development

Grasshopper Plugins

Research

Three.js

Prototyping

Redux

Agile

React

Typescript

Publications

Journal of Architectural Science
The Shakedown: Developing an Indoor-Localization System for Quantifying Toilet Usage in Offices (2020)

CAADRIA Conference
Sanitary Sanity: Evaluating Privacy Preserving Machine Learning Methods for Post-Occupancy Evaluation (2020)
